

Lalit Mohan Mekap

Bhubaneswar, India 751012 | 7008535558 | lalitmohanmekap123@gmail.com | [Linkedin](#) | [Github](#)

PROFESSIONAL SUMMARY :

Final-year Computer Science Engineering student with a focus on Artificial Intelligence and Full-Stack Web Development. Proficient in Python, Java, JavaScript, and data analysis , with a solid understanding of database systems and API integration. Seeking an entry-level role to apply analytical problem-solving and technical expertise to develop impactful, real-world solutions..

EDUCATION :

Siksha 'O' Anusandhan

Oct. 2022 – June 2026

Bhubaneswar Bachelor of Technology, Computer Science and Information Technology

SKILLS :

Languages: Python, Java, C++, SQL (Postgres)

Data Annotation & Analysis: Spatial Reasoning (Latitude/Longitude/Depth), Temporal Boundary Tracking, Object/Data Categorization, High-Precision Data Cleaning.

AI & Prompting: Local AI Agent Configuration (**OpenClaw, NemoClaw, claude**), Iterative Prompting, Model Output Evaluation, System Feedback loops.

Full-Stack Web Development: Proficient in building responsive, mobile-optimized applications using HTML, TailwindCSS, and JavaScript. Experienced in backend proxy setup and secure RESTful API integration using Node.js.

Database Management: Solid foundation in database design principles, data structuring, and secure data handling to support dynamic, data-driven web applications.

Developer Tools: Git, GitHub, Jupyter Notebook, Google Colab, Google Antigravity , VS Code

PROJECTS :

Multi-Model Earthquake Prediction Framework (Undergraduate Research)

- **Data Engineering:** Engineered a data pipeline using USGS ComCat APIs to process large-scale historical seismic datasets, focusing on precise temporal timestamps and spatial coordinates.
- **Modeling & Performance:** Developed models using 3D binning and time lags, achieving exceptional accuracy: **0.9644 R² (magnitude)**, **97.77% (risk)**, and **99.67% (binary)**, beating **90% targets**.
- **Documentation:** Authored comprehensive research reports and SOPs, translating complex data collection logic into accessible technical documentation.

Local AI Agent Deployment & Testing

- **Architecture:** Configured local AI models and implemented MCP servers to elevate agent frameworks for sophisticated data processing and tool utilization.
- **Optimization:** Applied systematic troubleshooting to refine ambiguous model responses and improve the accuracy of AI-driven interactions.

BalanceFit – Full-Stack Web Application

- **Development:** Developed a full-stack application to automatically categorize and track granular user health data, including calories and macronutrients.
- **API Integration:** Integrated secure external APIs to ensure high data integrity and seamless synchronization of health metrics.
- **Deployment:** Hosted the live application at balancefit-api.onrender.com.

EXTRA CURRICULAR ACTIVITIES :

- 🚩 **Open-Source AI:** Active tester and prompt engineer for local AI agents like OpenClaw and NemoClaw.
- 🚩 **Financial Research:** Applying data-driven analysis and technical indicators to stock market and intraday trading.
- 🚩 **Competitive Esports:** Participating in various sports events and esports gaming.
